

PHYSICAL THERAPIST ASSISTANT

The Physical Therapist Assistant program at the Institute of Technology is accredited by the Commission on Accreditation in Physical Therapy Education (CAPTE), 3030 Potomac Ave., Suite 100, Alexandria, Virginia 22305-3085; phone: 703-706-3245; email: accreditation@apta.org; website: <http://www.capteonline.org>. If needing to contact the program/institution directly please call Joshua Green, Physical Therapist Assistant Program Director at (530) 224-1000 or email: jgreen@iot.edu.

PROSPECTIVE STUDENT HANDOUT

Contacts: PTA Program Director: Joshua Green, PT, MA jgreen@iot.edu
 Director of Clinical Education: Jeff Hepburn, PTA jhepburn@iot.edu

PHYSICAL THERAPIST ASSISTANT PROGRAM

Thank you for your interest in the Physical Therapist Assistant (PTA) program at the Institute of Technology. As a prospective student we would like to provide you with some information regarding the program and the profession. This handbook includes the following information: general PTA description, program mission, program philosophy, program goals/objectives, licensure/certification information, graduation rates, exam pass rates, clinical affiliations, immunization, financial commitments, admissions process, curriculum, anticipated schedule, and frequently asked questions. The final pages, the Observation Verification Form and essay topic, are required as part of your application to the program.

Non-Discrimination Policy

IOT complies with Section 504 of the Rehabilitation Act of 1973 and Title III of the Americans with Disabilities Act of 1990. These federal laws prohibit discrimination on the basis of gender, including sexual harassment; sexual orientation; genetic information; race; color; religion; national origin; age; veteran status; and disability in the education programs and activities that they operate. IOT requires all affiliates to comply with the same standards for nondiscrimination.

Description of the Physical Therapist Assistant (PTA)

“Physical therapist assistants (PTAs) work as part of a team to provide physical therapy services under the direction and supervision of the physical therapist. PTAs implement selected components of patient/client interventions (treatment), obtain data related to the interventions provided, and make modifications in selected interventions either to progress the patient/client as directed by the physical therapist or to ensure patient/client safety and comfort.

Physical therapist assistants (PTAs) are educated and licensed clinicians who work under the direction and supervision of a physical therapist.

PTAs assist the physical therapist in the treatment of individuals of all ages, from newborns to the very oldest, who have medical problems or other health-related conditions that limit their abilities to move and perform functional activities in their daily lives. Working closely with the physical therapist, they may provide components of care such as therapeutic exercise, functional training, deep soft tissue massage, and physical modalities such as electrotherapy and ultrasound. PTAs may also provide instruction in exercise, proper body mechanics, and other injury prevention and wellness topics.

PTAs provide care for people in a variety of settings, including hospitals, private practices, outpatient clinics, home health agencies, schools, sports and fitness facilities, work settings, and nursing homes.” (Retrieved from <http://www.apta.org/AboutPTAs> updated August 21, 2013)

For additional information on the PTA profession, please utilize the following sites:

- American Physical Therapy Association – <http://www.apta.org>

Program Mission Statement

The mission of the PTA Program is to prepare entry-level physical therapist assistants competent in the contemporary practice of physical therapy by providing a quality education for our students and a qualified graduate for the employers and clients.

Program Philosophy

IOT promotes excellence in education by offering a comprehensive curriculum to prepare safe, competent, compassionate, and ethical PTAs to meet the needs of contemporary practice of physical therapy. The PTA faculty offers integrated learning experiences in the classroom, lab, and clinic to develop application of knowledge, communication, respect for others, ethical and legal judgment, critical thinking and problem solving skills. The student must accept responsibility to actively engage in the learning process. Graduation from the PTA Program is only the beginning of professional development. The faculty models life-long learning and the student is encouraged to commit to continued self-directed learning to provide evidence based care and remain current in the practice of physical therapy.

Program Goals, Objectives, and Expected Outcomes

The encompassing goal of the PTA program is to educate and develop safe, competent, compassionate, knowledgeable, and ethical PTAs to secure an entry-level position as a licensed PTA to work under the supervision of a physical therapist. The PTA program will offer a solid foundation for the PTA to continue self-directed learning experiences to remain contemporary in the practice of evidence based physical therapy.

Graduates of the program will:

1. Competently integrate theoretical knowledge and clinical skills to provide safe and effective entry-level physical therapy interventions, data collection, and documentation under the supervision of a physical therapist and based on a plan of care developed by the physical therapist.
 - a. The ultimate FSBPT pass rate will be at least 85% averaged over two (2) years.
 - b. Employers will rate graduates at entry-level or above at time of hire (85%).
 - c. The mean performance of the graduating class will be at or above the national mean for each area in the FSBPT Content Report.
 - d. Graduates will be rated at entry-level on the Clinical Problem Solving, Interventions, and Documentation criteria categories in the CPI.
2. Communicate effectively with all stakeholders, including patients/clients, family members, caregivers, practitioners, and inter-professional team members to achieve outcomes established in a plan of care.
 - a. Graduates will be rated at entry-level on the Communication and Cultural Competence criteria in the CPI.
 - b. Graduates will pass Lab Practical Exams with a Communication component in the grading rubric.
3. Demonstrate ethical values and legal behavior consistent with the expected behavior, responsibilities, and duties of a licensed physical therapist assistant.

- a. Graduates will be rated at entry-level on the Clinical Behaviors, Accountability, and Cultural Competence criteria in the CPI.
 - b. Graduates will pass Laboratory Practical Exams requiring critical thinking regarding appropriate behavior.
- 4. Assume responsibility for continued professional development and growth.
 - a. Graduates will be rated at entry-level on the Self-assessment and Lifelong Learning criteria in the CPI.
 - b. Graduates will complete a career plan prior to graduation.
 - c. 50% of graduates will participate in a professional organization or have taken a continuing education course within one (1) year of graduation.
- 5. Attain employment as a Physical Therapist Assistant to work under the supervision of a Physical Therapist.
 - a. The employment rate will be at least 90% averaged over two (2) years based on students who passed the NPTE-PTA.

PTA Program faculty will:

- 1. Grow personally and professionally and create community awareness of their capabilities.
 - a. Demonstrate a commitment to the profession of physical therapy through participation in life-long learning opportunities, professional organizations, or community involvement.
 - b. Maintain licensure in at least one state/ territory through completing required continuing education.
- 2. Instruct a contemporary, evidence-based curriculum.
 - a. Enhance the curriculum with the inclusion of evidence-based current literature and through sharing appropriate clinical experience.
 - b. Cover and assess all course objectives in a given course.

The PTA program will:

- 1. Support the diverse physical therapy healthcare needs of California communities through employment of physical therapist assistants working under the supervision of physical therapists.
 - a. The employment rate will be at least 90% averaged over two (2) years based on students who passed the NPTE-PTA.
 - b. 85% of employers will rate graduates as “well prepared to highly prepared” for contemporary practice.
- 2. Prepare entry-level competent physical therapist assistants as evidenced by successful completion of the National Physical Therapy Exam and qualification for state licensure.
 - a. The ultimate FSBPT pass rate will be at least 85% averaged over two (2) years.
 - b. The mean performance of the graduating class will be at or above the national mean for each area in the FSBPT Content Report.
- 3. Collaborate with clinical sites to support the clinical instructors and provide educational opportunities for the instructors to develop skills to enhance the clinical education experience for the instructor and the student.
 - a. Offer CEU class(es) for clinical instructors.

- b. Offer CI credentialing class working towards 25% CI credentialing.
 - c. Sponsor Annual CI luncheon.
4. Provide a non-threatening environment that is mindful of individual differences, free from discrimination, and respectful of people's rights and dignity.
 - a. Graduation rates will be at least 60% averaged over two (2) years.
 - b. 90% of students will positively rate their experience at IOT.

Licensure/Certification

Currently, PTAs are licensed or certified in all 50 states. Licensure or certification is required in each state in which a PTA works and must be renewed on a regular basis. Each state has established independent requirements and fees for the PTA to practice. Initial licensure is based on graduation from an accredited institution and successful completion of both the National Physical Therapy Examination (NPTE) and a Jurisprudence Examination specific to a jurisdiction/state for which licensure is sought. The Federation of State Boards of Physical Therapy (FSBPT) develops and administers the NPTE for PTs and PTAs, as well as the Jurisprudence examination for the State of California. More information regarding the national exam can be obtained by visiting <http://www.fsbpt.org/>.

Felony Conviction

If a student has a felony conviction, of any kind, the Institute of Technology cannot guarantee that the student will be able to attend the clinical practicum/internship site of their choice. Future employment and licensure/certification as a PTA may be limited and/or unavailable. Generally, the licensing Board reviews whether the violation of code, crime, or act is substantially related to the qualifications, functions, or duties of a licensee. Other factors that are considered include: the nature and severity of the acts or crime; the time that has elapsed since the commission of the acts/crimes; and the extent to which the applicant has complied with any terms or condition of probation imposed.

Graduation Rate, Exam Rate, Acceptance Rate and Employment Rate

Graduation Rate = Not Available

National Exam Pass Rate = Not Available

*Acceptance and employment rates are not available.

Essential (Required) Skills and Functions of a Physical Therapist Assistant (PTA)

The following describes the knowledge, attitude, motor skills, abilities, and behaviors essential for completion of the PTA program. These essential functions carry forward into the requirements of a licensed physical therapist assistant. The following list may not be all inclusive and may be dependent on the specific work conditions at site of future employment. The abilities listed are the basis for safe and effective practice.

Institute of Technology complies with the requirements of the Americans with Disabilities Act (ADA) and will make reasonable accommodations for an applicant with a documented disability who is otherwise qualified for acceptance into the physical therapist assistant program. Applicants must be able to perform these essential functions with or without reasonable accommodations in order to be successful in the PTA program and as a licensed PTA.

Observation:

Observation involves the functional use of vision, hearing, and somatic sensations.

Standard: The student must be able to observe lectures (both in-person and virtually), lab demonstrations, images, and patient presentation.

Essential Functions: The student must be able to observe and appraise a patient and their situation/environment accurately. Students must be able to observe therapeutic devices in order to determine a patient's treatment, condition, or response to treatment. Examples include, but are not limited to: patient's mental state and cognitive ability, palpation of peripheral pulses, bony prominences, physical presentation, posture and alignment, visual and tactile assessment of inflammation, swelling or edema, wound color and size, and gait analysis.

Communication:

Competence in communication is fundamental in the career of the PTA student. Verbal and non-verbal communication skills are required to effectively instruct patients, caregivers and family members in any part of the treatment plan. Effective communication is also vital to collaborate and integrate within the PT/PTA team.

Standard: Communication includes speech, language, reading and writing in English, and computer literacy.

Essential Functions: Students must be able to communicate effectively and sensitively with patients to elicit necessary information regarding patients' status through both verbal and non-verbal cues. Students must be able to communicate effectively and efficiently with other members of the health care team to convey essential information for continuity of safe, ethical care. Students need to communicate with individuals in a culturally sensitive way, while considering individual differences. They need to give full attention while listening to others, ask relevant questions, and not interrupt. Students must be able to read, speak, and understand English at a level of competence consistent with successful course, clinical, and licensing completion.

Motor Skills:

Motor skills require the coordination of both gross and fine muscular movement, balance, and the use of touch and vision.

Standard: Students must possess sufficient motor function to elicit responses and information from patients for use in assessment and interventions. **Essential Functions:** Students must be able to execute movements required to provide general and therapeutic interventions including, but not limited to: positioning patients of varying sizes and weights, draping and transferring patients, gait training with various assistive devices, applying orthotics and prosthetics, performing range of motion and other manual techniques, performing nonsurgical wound care, placing of electrodes onto body surfaces, and applying ultrasound applicators appropriately.

Essential Functions:

Task	Level	Weight	Frequency
Lifting/Lowering/Carrying	Hip Level	10 – 50 lbs	Occasionally – Frequently
	Waist Level	1 – 20 lbs	Occasionally – Frequently
	Above Shoulder	1 – 10 lbs	Occasionally
Pushing/Pulling		2 – 50 lbs	Occasionally
Reaching			Occasionally – Frequently
Standing			Frequently
Walking			Frequently
Climbing Stairs			Occasionally
Twisting/Bending			Occasionally
Sitting			Occasionally
Kneeling			Occasionally
Squatting/Crouching			Occasionally
Firm Grasping			Frequently
Feeling/Tactile Sensation			Frequently

Intellectual and Conceptual:

These abilities include tests and measurements, calculation, reasoning, analysis, judgment, numerical recognition and manipulation.

Standard: Problem-solving, critical thinking, and clinical decision-making are key skills required of the PTA. These abilities must be performed quickly, effectively, and efficiently, especially in emergency situations.

Essential Functions: Students must be able to identify significant findings from the patient chart, including the physical therapy plan of care to provide safe and appropriate interventions. Students must recall information in an efficient and timely manner. The ability to incorporate new information from peers, instructors, medical literature, and courses into a lifelong learning plan is vital. Knowledge and skills gained in this area will maintain currency of treatment interventions.. Sound judgment in patient assessment and therapeutic planning are essential. Students must understand their role and scope of work and communicate this to others when appropriate. Students must assist in collecting and managing data for the physical therapist’s patient load.

Behavioral and Social Attributes:

Students must demonstrate legal and ethical behavior and recognize the psychosocial impact on the patient, as a result of impairment, functional limitation, or disabilities while integrating their needs into the plan of care.. This includes patient, client, family, and caregiver education.

Standard: The student must possess the psychological ability to exercise of sound judgment, and the prompt completion of all responsibilities assigned. Additionally, it encompasses not only the care of the patients, but the development of mature, sensitive and effective professional relationships with them and other health care providers. The student must display respect for individual, social, and cultural differences in patients, caregivers, and peers.

Essential Functions: Students must be able to handle the stresses of a fulltime educational course load during the didactic portion of the PTA program, along with a fulltime patient caseload by

their final clinical. They must be able to work effectively to manage stress and resources, displaying organization, time management, and flexibility as they learn to face future demands of the health care environment and patient management. Students must be able to accept criticism and feedback. They must apply professional attributes that include altruism, caring, compassion, integrity, responsibility, continuing competence, duty, PT/PTA collaboration, and social responsibility.

Clinical Practicum/Externship Sites

As per accreditation requirements, the Institute of Technology presently has over 150% clinical education sites for the PTA program. By securing at least 150% clinical education sites, a variety of experiences are provided to the students including: acute care, home health, out-patient, rehabilitation, pediatric, and skilled nursing facilities. Students will be placed in two (2) diverse settings to optimize a variety of experiences. Clinical Practicum experiences are 40 hours per week, lasting a total of 16 weeks. Students will likely be traveling to clinical sites outside of Redding, but within the state of California. The student is expected to travel or relocate and is responsible for transportation and housing costs associated with long distance clinical practicum assignments.

Health Records and Immunizations

Prior to beginning clinical experiences, the student must provide the Director of Clinical Education with proof of the following information:

1. Documentation of immune status to measles, mumps, and rubella (Vaccination record or titer results)
2. Results of a current TB skin test and/or chest x-ray indicating no active disease if the TB test results are positive. This must be repeated on an annual basis.
3. Hepatitis B vaccination
4. Current Tetanus/Diphtheria immunization.
5. Varicella titer or immunization
6. Current CPR card at the Health Care Provider level.
7. Annual flu vaccine, if required by the facility
8. Additional requirements per clinical site

Health Insurance

The Institute of Technology does not provide health insurance to students. Students are encouraged to seek their own health insurance through a recognized insurer or through a federal/state program. Clinical sites utilized for student clinical experiences are not responsible for health care costs of students who are injured while performing patient care services.

Background Check

All students complete a background check including state and federal registries as well as fingerprinting. A clinic reserves the right to refuse acceptance of a student based on the finding listed in any of these

instruments. The student may be subject to random drug testing at a clinic site based on the facility's policy.

Financial Commitments

Finances are often high on a list of student concerns. Listed below are some of the anticipated expenses in the Physical Therapist Assistant program at Institute of Technology. All prices are estimated and fees are subject to change without notice.

<u>Tuition</u>	<u>Reg. Fee</u>	<u>Textbooks/Supplies</u>	<u>Uniform/Kit</u>	<u>Total</u>
\$30,900	\$75	\$1,771	\$251	\$32,997

Uniforms

Each PTA student is provided with 4 sets of uniforms (4 polo shirts); khaki pants are required and will need to be purchased separately. Additional uniforms can be purchased by the student at their expense.

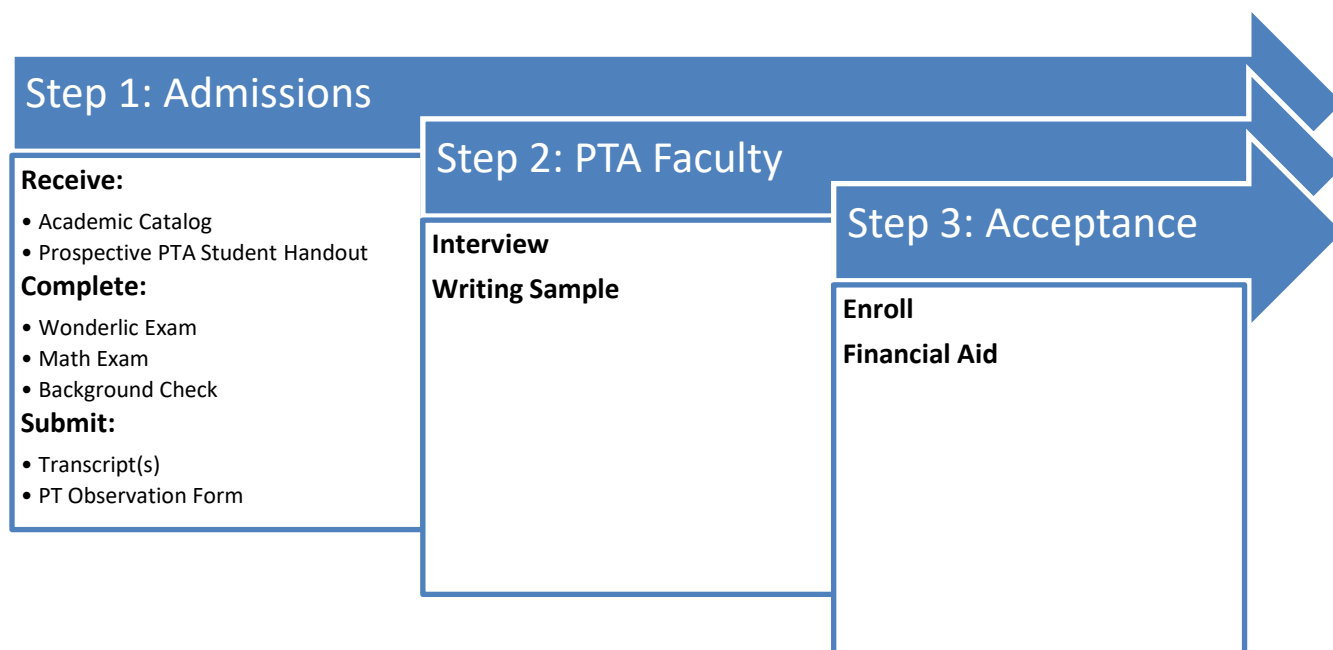

Clinical Practicum/Externships

The student is responsible for transportation and housing costs associated with long distance clinical practicum assignments and is not included in above stated total costs.

Admissions Process

The admissions policy is designed to be fair and equitable for all persons applying to the Physical Therapist Assistant (PTA) Program. Prior to consideration for admission to the PTA Program, the prospective student

must first satisfy the admissions requirements for the Institute of Technology as stated in the Academic Catalog. An overview of the admissions process is represented in the graphic below followed by the specific requirements.

1. **Admissions** – schedule a meeting with admissions, where the prospective student will:
 - a. Receive:
 - Academic Catalog
 - Prospective PTA Student Handout
 - b. Complete:
 - Wonderlic Exam
 - The prospective candidate must score at least twenty out of fifty points (20/50).
 - Note: the prospective candidate may take the Wonderlic Exam no more than three times per application cycle. If the exam is taken more than once, the top two scores will be averaged for the PTA admissions rubric. One score must be above twenty (20), but the average may be below the minimum required.
 - Math Exam
 - The prospective candidate must score at least an eighty percent (80%) on the twenty-five (25) question IOT-generated math exam (20/25).
 - Note: the prospective candidate may take the Math Exam no more than two times per application cycle. If the exam is taken more than once, the two scores will be averaged for the PTA admissions rubric. One score must be above twenty (20), but the average may be below the minimum required. The Math Exam must be completed without the use of any technology (i.e. calculators, phones, etc.); there is no time-limit.

Background Check

- The prospective candidate must complete and submit an acceptable FBI background check and fingerprint analysis.
- Note: the purpose of this background check is, in part, to ascertain the ability of a student to meet the requirements of clinical education sites and to become licensed physical therapist assistants.

c. Submit:

Transcript(s)

- Official high school and/or college transcripts must be submitted as proof of prior competency level(s).

Physical Therapy (PT) Observation Form

- The prospective candidate must complete at least one-day (minimum of 4 hours) of observation of Physical Therapy practice at a location of their choosing. Please see observation sheet for additional hours.

*Note: all of the above components must be completed and submitted prior to progressing through the admissions process.

2. **PTA Faculty** – once a successful application packet is submitted to admissions, the prospective student will have the following with the PTA faculty (PTA Program Director and Director of Clinical Education):

a. Interview

A brief interview with the PTA faculty will be conducted that will evaluate the prospective candidate's communication skills, motivation for the program, knowledge and commitment to the profession, as well as technical standards (i.e. physical abilities and limitations).

b. Writing Sample

The prospective candidate will submit an essay that describes their willingness to enter the profession and provides an overview of their experience during their Physical Therapy Observation. This essay should be a minimum of a half to full page and will be graded based on the candidate's ability to fully justify their response, organization, as well as grammar and spelling.

3. **Acceptance** – when a student has satisfactorily completed all of the requirements above, they will be notified by letter of acceptance into the program. Acceptance and admission is based on a rolling admissions process, so it is best to complete and submit all required components as soon as possible. If a class is full, a waiting list will be created from which students may enter if an accepted student is unable to matriculate.

a. Enroll

If the candidate wishes to acknowledge receipt of the acceptance letter and enroll in the program, they must respond within thirty (30) days or before the start of classes (whichever is less time) to reserve a seat in the class.

b. Financial Aid

The accepted student will meet with financial aid to finalize their tuition plan.
Note: this step is available prior to enrollment if preferred.

PTA Curriculum

The PTA program is presented over a period of 80 weeks. This period is divided into five (5) 15-week semesters consisting of 933 clock hours spent in the classroom and laboratories. Clinical Practicum experiences consist of 640 clock hours spent in clinical facilities at 40 hours per week. There is a one week recess between semesters and a two week winter recess from didactic courses. Students must maintain a minimum grade average of 70% and no less than 76% on practical exams. Failure to complete coursework in a given semester may require students to wait approximately 48 weeks to retake the coursework.

Upon successful completion of the PTA program, the graduate will receive an Associate in Applied Science (AAS). Graduates of a CAPTE accredited program are eligible to sit for the National Physical Therapy Examination for PTAs. The school will assist the graduate in finding employment. However, this is not a guarantee of employment or a minimum starting salary.

Curriculum Requirement		Semester Credit Hours	Contact Hours	
			Lecture	Lab
Semester 1

PTA 270	Clinical Practicum II (8 weeks)	7.0	320	
Total		65.5	1,573	

Frequently Asked Questions

1. How many students are admitted into the program?

The Institute of Technology currently accepts 16-36 students into each class for the PTA program. Admission and acceptance into the program is in order of application, if a baseline score is obtained by the applicant during the admissions process.

2. Is there a deadline to complete the admissions process?

Prospective applicants must complete the admission process prior to the start date of each class.

3. What is the alternate/waiting list?

If the quantity of applicants exceeds the number of openings, Institute of Technology finds it necessary to place some applicants on an alternate list. An alternate list is similar to a standby list, in which the school will move prospective students placed on the alternate list into acceptance as openings are made available. Those students placed on the alternate list will have the first opportunity to join the next class.

4. Is the program accredited?

The Institute of Technology has established institutional accreditation from the Accrediting Commission of Career Schools and Colleges (ACCSC) and received ACCSC approval for the Physical Therapist Assistant (PTA) program December 13, 2017. The PTA program is also approved by the Bureau for Private Postsecondary Education (BPPE) in the state of California. The Institute of Technology has been granted Candidate for Accreditation status (October 29, 2019) by the Commission on Accreditation in Physical Therapy Education (CAPTE). Candidacy is not an accreditation status nor does it assure eventual accreditation. Candidate for Accreditation is a status of affiliation with the Commission on Accreditation in Physical Therapy Education that indicates the program is progressing toward accreditation.

5. What is the class schedule?

The PTA program admits one class/cohort per year. For cohorts starting in an odd numbered year, the classes will generally run in the morning from 8AM to 12PM. For cohorts starting in an even numbered year, the classes will generally run from 1PM to 5PM.

6. Will my previous college credits transfer?

This decision is determined on an individual basis by the Director of Education and Program Director. Institute of Technology recommends that each student completes the curriculum in its entirety, but exceptions will be made on preparatory/general education course work or completed courses from CAPTE accredited PTA programs.

7. Will credits from Institute of Technology transfer to another institution?

The Institute of Technology does not guarantee transfer of credit. Transferring credit is up the receiving institution. It is not common for a regionally accredited university or community college to accept credits from a nationally accredited institution.

8. Where can you complete the required Observation Day?

Contact a therapy clinic, hospital, or skilled nursing facilities in your local community. Ask the secretary of the PT department if you can observe a physical therapist for a day as a prospective PTA student. One day of observation is required.

9. Is Financial Aid available?

Financial Aid is available to eligible students. Please contact your Admission Representative to schedule a Financial Aid appointment.

Accreditation Disclosures

Accreditation Information Required by the State of California and the Commission on Accreditation in Physical Therapy Education (CAPTE):

1. The entry-level Physical Therapist Assistant (PTA) program is **pending accreditation by the Commission on Accreditation in Physical Therapy Education (CAPTE)** recognized by the United States Department of Education. The PTA program is not accredited.
2. The start date of the charter class was December 2, 2019 with an anticipated graduation date of July 1, 2021.
3. Effective October 29, 2019, the Institute of Technology – Redding Campus has been granted Candidate for Accreditation status by CAPTE.
4. If the program is accredited by CAPTE, the date of the first licensure examination for which graduates (from the charter class) will be eligible is April 27, 2022. The licensure examination is offered by FSBPT.
5. If the program is not accredited by CAPTE, and the student wishes to continue with their PTA education, the student may apply to another institution to complete their PTA program. IOT does not have arrangements with other institutions to accept IOT PTA students.
6. If CAPTE does not approve IOT for programmatic accreditation, the student will have spent three years of education at an institution not accredited. Student will not be eligible to obtain licensure or certification in any state nor practice as a Physical Therapist Assistant.
7. Student loan or other financing may be affected if the student elects to change institutions.
8. If the PTA program is not accredited by CAPTE, all students enrolled in the PTA program will receive a total and complete refund of all tuition and fees.

Application Confirmation Checklist

Instructions:

Please read each statement, and then place a check mark to confirm your understanding. Retain a copy for your records.

- _____ I have received and read all of the material contained in the PTA Prospective Student Handout and understand the application and selection process.
- _____ I have received Institute of Technology's Academic Catalog.
- _____ I understand that my application will not be considered if it is incomplete, or does not meet the application/program requirements.
- _____ I understand that it is my responsibility to follow proper application procedures and timelines, in addition to providing required transcripts.
- _____ I understand that the PTA program admission policies are based on published college policies; program admission is an equal opportunity process and persons are not excluded based on ethnicity, age, gender, religion, disability or other legally protected statuses.
- _____ I understand that Institute of Technology reserves the right to make revisions to the PTA program requirements and/or selection procedures.
- _____ I understand that if I am notified of being admitted into the program, my failure to submit confirmation of acceptance in the allotted time frame constitutes grounds to withdraw my name from the eligibility list.

Thank you again for your interest in our program.

Instructions:

This form is to be completed by a supervising Physical Therapist/Assistant and will be reviewed as part of the admissions process for the Physical Therapist Assistant Program. Although applicants are not required to meet a minimum total of hours, exposure to the profession is encouraged prior to enrollment. The supervising PT/PTA must verify the hours; the facility cannot be owned or operated by a relative and the supervising PT/PTA cannot be a relative. Your participation in the verification process is important and we appreciate your willingness to promote higher learning, the practice of Physical Therapy, and entry into the profession.

If you have any questions, please contact Joshua Green, PTA Program Director at Institute of Technology at jgreen@iot.edu or (530) 224-1000.

Application Essay

The following essay is to be completed before your interview with the PTA faculty. Please bring it with you to your interview with the PTA faculty or give it to your admissions advisor to put in your file. This is a required component that is graded as part of the interview process.

Instructions:

In no less than a half to full page of typed words, please answer the following:

1. Why do you want to be a Physical Therapist Assistant?
2. Describe a situation or experience during your Physical Therapy Observation that represents “good” or “excellent” physical therapy.
3. Based on your current knowledge, what challenges or changes do you foresee for Physical Therapist Assistants in the future?

We look forward to reading your response. Good Luck.

THANK YOU FOR YOUR SUPPORT OF OUR PROSPECTIVE APPLICANT!
